

4-Biphenyl-substituted pyrazolidine-3,5-dione derivatives

Abstract

The present invention relates to novel 4-biphenyl-substituted pyrazolidine-3,5-dione derivatives of the formula (I)

in which

A, D, G, W, X, Y and Z are as defined above,

to a plurality of processes for the preparation and to their use as pesticides and/or herbicides and/or microbicides.

Moreover, the invention relates to selective herbicidal compositions comprising both the 4-biphenyl-substituted pyrazolidine-3,5-dione derivatives of the formula (I) and a crop plant compatibility-improving compound.
